

CocoOne Product Portfolio

An Australian owned and operated Company

Our story so far

CocoOne is an Australian owned brand who is bringing some of the best quality plant-based coconut products to the consumers the world over.

We've spent a lot of time researching the source of our product, and came to the conclusion Vietnam has not only some of the most nutritious Coconut product on the planet, our manufacturing partner has strong ethical and social work practices too.

So we're bringing some sound business experience in manufacturing and developing healthy food products, some of our team even food scientists, some of us speak the local language in Vietnam, and we've worked hard on our recipes to make sure they are healthy, nutritious, and we're happy drinking all of these products ourselves as well as consumed by our families and friends!

Why Plant based Coconut products

The Plant based beverage movement is fast gathering momentum, this is due to the focus on healthy gut flora and the consumer looking to reduce their sugary intake.

This is where Coconut products come in. When we walk our factory floor, what we see is not engineered soft drinks, sugary energy drinks and highly processed drinks.

Rather we see coconuts grown from trees, being cracked open everywhere to produce our range of products. That is as natural as it can get.

No sugar, no additives or preservatives, just plain raw coconut products grown in the tropics of central highlands of Vietnam.

Why are coconut based products so good ?

100% PURE NATURAL COCONUTS AS THE RAW MATERIALS
IN ALL OF OUR PRODUCTS
NO CONCENTRATE AND NO SUGAR ADDED JUST PURE GOODNESS!

Our all-natural prime coconut water is sourced from freshly harvested single-origin coconuts. We never add any any artificial colours, flavours or sweeteners, even in our Organic Coconut milk range.

We only ever use the best quality, all-natural ingredients, so you can trust that CocoOne is the best coconut based products that you can drink.

Not only do our sparkling coconut waters taste delicious, they're also packed with all the health benefits of our prime coconut water. Made with 100% natural ingredients and absolutely no added sugar, no artificial flavours, colours or preservatives CocoOne coconut water contains five naturally occurring electrolytes essential to your health, which are potassium, calcium, magnesium, phosphorus and sodium.

The perfect healthy alternative to regular soft drinks, you can buy CocoOne direct or through our many stockists and distributors.

Natural Organic Coconut water benefits

Just one cup of CocoOne coconut water contains 25% of your recommended daily intake* of phosphorus. This key mineral works alongside calcium to help strengthen teeth and bones. Magnesium supports healthy brain function, while sodium helps to regulate the fluids in your body.

*RDI based on data for Australian Adults (men and women) aged 19-50 years old

CocoOne coconut water contains five naturally occurring electrolytes essential to your health, which are potassium, calcium, magnesium, phosphorus and sodium.

The perfect healthy alternative to regular soft drinks, it is truly the electrolyte gift from the gods, so no need for sugary energy drinks.

Drink it straight from nature, straight up!

Original hero product
